## Critical Fields :

1. **Name :** It is used to create the asset name. The name of an entity (record) is used as an default search option in addition to the search key. The name is up to 60 characters in length.
2. **Asset Group :** The group of assets determines default accounts. If an asset group is selected in the product category, assets are created when delivering the asset.(Refer Asset Group Master)
3. **Product :** It is used to mention the product name. Identifies an item which is either purchased or sold in this organization.

## Critical & onetime setup fields :

1. **Organization Field-** This Field is used to select the organization which you are going to process the document.

## **Non-Critical Fields :**

1. Lot No : The Lot Number indicates the specific lot that a product was part of.
2. In Service Date : The date when the asset was put into service - usually used as start date for depreciation.
3. Project : A Project allows you to track and control internal or external activities.(Refer Project Master)
4. Locator : The Locator indicates where in a Warehouse a product is located.(Refer Warehouse Master)
5. BPartner (Agent) : Business Partner (Agent or Sales Rep)
6. Owned : The asset may not be in possession, but the asset is legally owned by the organization
7. Depreciate : The asset is used internally and will be depreciated
8. Last Maintenance : Used to mention the last maintenance date.
9. Last Note : Used to mention the last Maintenance note.
10. Next Maintenance ; Used to mention the next Maintenance date.
11. Disposed : The asset is no longer used and disposed
12. Asset Disposal date : Date when the asset is/was disposed
13. Next Unit : Used to mention the next Maintenance unit.
14. Last Unit : Used to mention the last Maintenance unit.
15. In Possession : Assets which are not in possession are e.g. at Customer site and may or may not be owned by the company.
16. User/Contact : The User identifies a unique user in the system. This could be an internal user or a business partner contact
17. Activity : Activities indicate tasks that are performed and used to utilize Activity based Costing(Refer Activity Master)
18. Guarantee Date : Date when the normal guarantee or availability expires
19. Revaluation Date : Used to mention the revaluation date.
20. Manufactured Year : Used to mention the manufactured year
21. Serial No : The Serial Number identifies a tracked, warranted product. It can only be used when the quantity is 1.
22. IsTool : If we select this box , this indicates the asset is a tool.

23. Vehicle Management System : If we select this box , this indicates the created asset is a vehicle management asset.

## **Zoom condition's :**

1. We can zoom and find the calibrations by using this Assets.
