

Calculate Low Level

- Introduction
- Process

Introduction

This Screen is used to represent the lowest level of usage of material within the product structure

Process

The screenshot shows a software window titled 'Calculate Low Level' with a close button (X) in the top right corner. The window has a tab bar at the top with 'Home (34)' and 'Calculate Low Level'. The main content area contains the following text:

This process calculate and register the lowest level of a product inside any BOM. It is used in the MRP calculations and should be executed when you enter a new BOM.
This process calculate and register the lowest level of a product inside any BOM. It is used in the MRP calculations and should be executed when you enter a new BOM.

Below the text, there is a checkbox labeled 'Run as Job' which is currently unchecked.

At the bottom right of the window, there are two buttons: 'Start' (with a green checkmark icon) and 'Cancel' (with a red X icon).

While the User click on the "ok" button system will identify the low level product inside any BOM.
