

Calculate Material Plan

- Introduction
- Process

Introduction

Material planning is the process of figuring out what and how much is needed in order to produce goods within specified timeframes, and ensuring the timely delivery of those materials

Process

The screenshot shows a SAP process window titled 'Calculate Low Level'. The window has a tab bar at the top with 'Home (34)' and 'Calculate Low Level'. Below the tab bar, there is a text area containing the following text: 'This process calculate and register the lowest level of a product inside any BOM. It is used in the MRP calculations and should be executed when you enter a new BOM.' Below this text, there is a checkbox labeled 'Run as Job'. At the bottom right of the window, there are two buttons: 'OK' and 'Cancel'. A mouse cursor is pointing at the 'Run as Job' checkbox.

Organization : User have to select the organization name here.

Resource : User have to select the resource which they want to executive.

Warehouse: User have to select the warehouse which they want to be executive.

While the user click the ok button system will execute the transaction which come in the criteria mention above.
