

# Introduction

## Overview:

The consignment process is keeping the stock in customers premises, but until the customer consumes or sell it, it will be a part of the company. (It is not mandatory that we should stock the consignment stock in the customer's premises, we can store it in the company premises too).

## Business Case:

Stock will move from consignment warehouse to customer warehouse and they sell the product to the consumer. According to the customer sale invoice amount will be payable to the vendor.
