Introduction

This screen allow the user to create a cost element against the organization, accounting schema, cost type, product category and product.

Process

The screenshot shows a web-based form titled "Create Element" with a close button (X). The form is designed for creating cost elements. It includes a header section with instructions: "Let create every cost elements defined for a Organization, Accounting Schema, Warehouse, Resource, Cost Type ,Product and Product Attribute Set Instance ." and "With this process is possible to create every cost elements defined for a Organization, Accounting Schema, Warehouse, Resource, Cost Type and Product." Below the instructions are several dropdown menus: "Organization", "Accounting Schema" (with a red asterisk), "Cost Type" (with a red asterisk), "Product Category", "Product", and "Attribute Set Instance" (with a small icon). A checkbox labeled "Run as Job" is located below the "Attribute Set Instance" dropdown. At the bottom left, there is a "Saved Parameters" section with a dropdown menu and two icons (a folder and a trash can). At the bottom right, there are two buttons: "OK" (with a green checkmark) and "Cancel" (with a red X).
