

Email Alert Configuration

- Introduction
- Steps

Introduction

Overview

Email Alert is an usefull method to send a notification to customer or a vendor for regular updates regarding transactions.Here i have explained about the configuration to be done for email alert.

Steps

- Open Konnect Action configuration window in Konnect ERP
- Select the organization or * to configure for multiple org.
- Enter a name
- Select Konnect Email Report in KA_Action_Type* field.Example (Purchase Order)
- Select Document action.
- Select the table for which the Email alert needs to be populated.
- Select the print format that needs to be sent if any.
- Enter the Sql query in Sql WHERE field if any. Example (issotrx = 'N')
- Select the Subject which needs to be populated in mail. Example(Purchase Order from Konnect Analytics @DocumentNo@
- Enter the mail text.Steps for updating below.

The screenshot shows the HTML5-Editor.Net website. The browser address bar displays 'html5-editor.net'. The page header includes the site logo, 'DEMO' and 'HELP' buttons, and a search bar with the text 'We're hard to find: CTRL + D'. The main content area is split into two panels. The left panel shows the HTML code for an email template, with line numbers 1 through 9. The right panel shows a preview of the rendered email content, which includes a greeting, a wish for a good day, a statement about a purchase order, a request for more details, a reminder to mention the purchase order number, and a disclaimer about the email being automatically generated.

```
1 <div>Dear Sir/Madam</div>
2 <div>&nbsp;</div>
3 <div>Wishing you good day.</div>
4 <div>&nbsp;</div>
5 <div>We have released Purchase order for you.</div>
6 <div>Please refer the attachment for more details and supply the
  material in right quantity and right quality.</div>
7 <div>Don't forget mention the purchase order no: in you Invoice
  copy.</div>
8 <div>&nbsp;</div>
9 <div>This is an automatically generated email, please do not
  reply to it. If you have any queries regarding our order please call
  impersona</div>
```
