Maintenance Cycle

The screenshot shows a web application interface for a 'Maintenance Cycle'. At the top, there's a navigation bar with 'Home (96)', 'Summary', and a tab for 'Maintenance Cycle: VMC Mach...'. Below the navigation bar is a toolbar with various icons. The main form area is titled 'Maintenance Cycle' and contains several input fields and controls:

- Client:** A text field with the value 'Konnect Demo'.
- Organization:** A text field with the value 'Manufacturing SPM'.
- Name:** A text field with the value 'VMC Machine PM'.
- Description:** An empty text field.
- Asset Group:** An empty text field.
- Asset:** A text field with the value 'Drilling Machine 1_Drilling Machine 1'.
- Maintenance Type:** A text field with the value 'Periodic Calendar'.
- Date last run:** A date and time picker showing '18/11/2020' and '4:09:01 PM'.
- Date next run:** A date and time picker showing '18/11/2020' and '4:29:01 PM'.
- Duration Unit:** A text field with the value 'Minute'.
- Interval:** A text field with the value '20.0' and a unit selector icon.
- Resource:** An empty text field.
- Active:** A checkbox that is checked, labeled 'Active'.

This window empowers you to efficiently oversee the maintenance life cycle, ensuring optimal performance by scheduling periodic maintenance against the asset.
