

Re-generate PO/PR

The screenshot shows a web application interface for 'Re-Generate PO/PR'. At the top, there are three tabs: 'Home (111)', 'Summary', and 'Re-Generate PO/PR' (which is active). Below the tabs, the main heading is 'Generate PO/PR for Sub-Contract Activity Control Report'. A sub-heading explains: 'Re-Generate the PR/PO for a Subcontracting Activity Control Report, The PR/PO that was previously generated from this Activity Control report would be Voided before a new one is created'. The main form area contains a label 'Manufacturing Cost Collector' followed by a text input field and a dropdown arrow. Below this is a checkbox labeled 'Run as Job'. At the bottom left, there is a 'Saved Parameters' section with a dropdown menu and two icons (a folder and a document). At the bottom right, there are two buttons: 'OK' with a green checkmark and 'Cancel' with a red X.

Parameters :

1) Manufacturing cost collector : It is used to select manufacturing order document no against which subcontract issue has been generated.

Process Use :

By using this process we can able to re-generate purchase requisition & purchase order which has been raised against manufacturing order.
