

# Operations Master

The screenshot displays the 'Operations Master' web application. On the left, there is a sidebar with 'Favorites' and 'Recent Items' sections. The main area shows a form titled 'Operations Master' with a 'Record saved' message. The form contains the following fields:

- Tenant\***: Sandbox
- Search Key**: 1000004
- Operation Name\***: Cutting
- Organization\***: Manufacturing Discrete
- Resource\***: CNC Lathe
- sequenceno**: 70
- Business Partner**: Embac equipments
- Description**: Cutting from outside
- Comments**: Cutting from outside
- Is Subcontracting**: ☒
- Active**: ☒

## Critical Fields

1. Operation Name : It is used to mention the name of the operation.
2. Resource : It is used to Select the manufacturing work center (previously defined) where you want to execute the operation. For the product costing, the Resource rate is taken from the cost element introduced in the window Product Costing (Refer resource master).

## Critical & onetime setup fields

## Non-Critical Fields

1. Search Key: Used to maintain unique name or code for the product
2. Sequence Number: o apply sequence for the phase of project to be followed. It will be auto-generated by system but user can edit accordingly
3. Is-Subcontracting : When we select this check box this operation is used for the

subcontracting process.

4. Active:- Checkbox for Active or in active status of substitute operation
  5. Business Partner : We should mention the Business partner name when we select the Is-Subcontracting check box (Refer Business Partner Master)
  6. Description: This is used to mention the description URL
  7. Comments: Use to note Comments Which are required with this document
-
