

# Version

The screenshot shows the 'Price List' version creation interface in Konnect Analytics. The top navigation bar includes the 'price list' search bar and user profile information. The left sidebar shows 'Favourites' and 'Recent Items'. The main content area is titled 'Price List > Version' and contains a form with the following fields:

- Client:** Konnect Demo
- Organization:** \*
- Price List:** Sales INR
- Name:** Sales INR
- Description:** (empty text area)
- Active:** ☒
- Price List Schema:** Standard
- Base Price List:** Sales INR
- Valid from:** 10/10/2017
- Create Price List:** (button)

## Critical Fields

1. Name : Used to create the price list version name . (Use characters and numbers)
2. Price List Schema : We should select the Price list schema from the master window (Refer Price List Schema master window).
3. Base Price List : The Base Price List identifies the Base Price list used for calculating prices (the source).

## Critical & onetime setup fields

1. Organization : This Field is used to select the organization which you are going to process the document.

## Non-Critical Fields

1. Valid From : The Valid From date indicates the first day of a date range

## Zoom condition's

## Validation

1. Create Price List : Create Prices for this price list version in the sequence of the Discount Schema Price List.

Lines with a higher sequence overwrite existing prices. The sequence should be from generic to specific.
