

# Replenish

The screenshot displays the 'Replenish' form in the Konnect Analytics application. The form is part of a 'Product Planning Data' window. It contains the following fields and values:

- Client:** Konnect Demo
- Product:** 1000000\_Copper Pipes
- Warehouse:** Manufacturing Discrete Store
- Organization:** \*
- Active:** ☒
- Replenish Type:** Reorder below Minimum Level (selected from a dropdown)
- Minimum Level:** 10.00
- Maximum Level:** 100.00

The interface also features a top navigation bar with links for Feedback, Profile, Preference, Change Role, and Log Out. A left sidebar contains sections for Favourites and Recent Items.

## Critical Fields

1. **Replenish Type :** We should select the replenish type from this list. a) Maintain Maximum Level - Replenishment quantities will be ordered if the inventory level is below the maximum level. b) Reorder Below Minimum Level - Replenishment quantities will be ordered if the inventory level is below the minimum level. c) Custom - It is possible to define a custom rule in software to calculate the replenishment quantities. The software class is defined in the Warehouse window. d) Manual - A Replenishment Plan is used to calculate when and how much material to order.
2. **Minimum Level :** Indicates the minimum quantity of this product to be stocked in inventory.
3. **Maximum Level :** Indicates the maximum quantity of this product to be stocked in inventory.

## Critical & onetime setup fields

1. **Warehouse :** It is used to select the warehouse name.(Refer Warehouse Master), The Warehouse identifies a unique Warehouse where products are stored or Services are provided.

## Non-Critical Fields
