

UOM Conversion

The screenshot shows the 'UOM Conversion' setup page in the Konnect Analytics application. The interface includes a top navigation bar with the 'product' search bar and user information (Prasanth P@Konnect Demo). A sidebar on the left contains 'Favourites' and 'Recent Items' sections. The main content area is titled 'Product: 1000000 Copper Pipes' and 'Product > UOM Conversion'. It contains several input fields: 'Client' (Konnect Demo), 'Product' (1000000_Copper Pipes), 'Organization' (empty), 'Active' (checked), 'UoM' (Each), 'UoM To' (Grams), 'Multiply Rate' (10.0), and 'Divide Rate' (0.1). The 'Multiply Rate' and 'Divide Rate' fields have a small icon next to them, likely for unit conversion or calculation.

Critical Fields

1. UOM : We Need to give the Stock UOM. The UOM defines a unique non monetary Unit of Measure.
2. UOM To : We Need to give the Unit which is to be converted. The UOM To indicates the destination UOM for a UOM Conversion pair.
3. Multiply Rate : To convert Source number to Target number, the Source is multiplied by the multiply rate. If the Multiply Rate is entered, then the Divide Rate will be automatically calculated.
4. Divide Rate : To convert Source number to Target number, the Source is divided by the divide rate. If you enter a Divide Rate, the Multiply Rate will be automatically calculated.

Critical & onetime setup fields

1. Organization Field- This Field is used to select the organization which you are going to process the document.

Non-Critical Fields
