Introduction

Introduction

Overview

1. Quality test plan master window is used to create the test plans. These test plans are used to check the product Quality.
-

Business Case

1. In a manufacturing company we can create the test plan for check the product quality,size and weight.(Ex : Weight test plan,Total Quality Check plan).
2. We can create multiple parameters in a quality test plan and use this test plan for the quality checking .
3. These type of quality checking are used in product incoming and outgoing places.
