Introduction

This screen allow the user to mention the set of activities and parts against the product.

Tabs

Tabs

Service Activity Master

The screenshot shows a web application window titled "Service Activity Master: As...". The main form area contains several input fields: "Client" (Sandbox), "Organization" (a dropdown menu), "Name" (Assembly line check), "Part Type" (a dropdown menu), "Duration" (1), "Duration Unit" (Day), "Product" (empty), and "Description" (a large text area). Below the form, there is a tabbed interface with "Activities" and "Activity Parts/Labor". The "Activities" tab is active, showing a table with columns: Name, Description, Part Type, Duration, Duration Unit, Active, Product For Labor Charges, Price, and Activity Group. The table is currently empty, displaying "No Records found".

Critical Fields:

- 1) client - This field is used to mention the client name.
- 2) organization: This field is used to select the organization

Critical & one-time setup fields:

- 1) Part Type - This is a user-defined field utilized for classification of service activity

Non-Critical Fields:

1) Duration- This field is used for mentioning the estimated time.

2) Duration unit - This field is capturing the UOM for the duration
