

Tab's

- Shift Configuration
- Shift Scheduler

Shift Configuration

The screenshot shows a web application interface for 'Shift Configuration'. At the top, there's a breadcrumb 'Home (162621)' and a tab 'Shift Configuration: oct 1...'. Below the tab is a toolbar with various icons. The main section is titled 'Shift Configuration' and shows a 'Record saved' message. The form contains several fields: 'Client' (XYZ Foundation), 'Organization' (empty), 'Name' (oct 1st week), 'Description' (empty), 'Valid from' (01/10/2019), and 'Valid to' (04/10/2019). Below the form is a 'Shift Scheduler' section with a table showing 1 record. The table has columns: Business Partner, Shift, Attendance Type, Department, Position, and Ka_ShiftConfiguration. The record shows 'Mohan' as the Business Partner, 'Day Shift' as the Shift, 'Attendance 1' as the Attendance Type, 'Purchase' as the Department, 'Purchase-Lead' as the Position, and 'oct 1 week' as the Ka_ShiftConfiguration.

Description: We can maintain this for any reference note

Shift Scheduler

The screenshot shows a web application interface for 'Shift Scheduler'. At the top, there is a breadcrumb trail: 'Home (162621) > Shift Configuration: oct 1...'. Below this is a toolbar with various icons for file operations and editing. The main form area contains several input fields and a checkbox. The fields are labeled with red text indicating required fields: 'Client*' (value: XYZ Foundation), 'Business Partner' (value: Mohan), 'Position' (value: Purchase-Lead), 'Shift*' (value: Day Shift), 'Organization*' (value: *), 'Department' (value: Purchase), 'AttendanceType' (value: Attendance 1), 'Description' (empty), and 'Ka_ShiftConfiguration' (value: oct 1st week). There is also a checkbox labeled 'Active' which is checked. The interface is clean and modern, with a light gray background and white input fields.

CRITICAL FIELDS:

Business Partner: We can Choose the employee's name

Department: Based on the Employee Department will be automatically fetched

Position: Based on the Employee Position will be automatically fetched

Attendance Type: Based on the Employee attendance type will be fetched from the salary Structure

Shift: We can define the particular shift for the particular period mentioned in the header

NON_CRITICAL FIELDS:

Client: It will display the client name

Organization: It will show the Organization within the Client

Description: We can maintain it for reference
