Introduction

Introduction:

This report is used to view the issued documents to the vendor for subcontracting (Outsource).

Business Example:

In a manufacturing industry there will be multiple operation performed to get the required component as per the customer requirement.Certain resource will not be available inside the company to perform few operations.So Requisition will be raised from Production Que and converted to purchase order.And Subcontract Issue will be done with delivery challan.to track the these details this report is used.
