Go to Settings to activate Windows.

## Criteria:

This report is used to track the open receipts need to receive from vendor.

## **Selection fields:**

- 1) Organization- An organization is a unit of your client or legal entity - examples are store, department. You can share data between organizations.
  - 2) **Business Partner**- A Business Partner is anyone with whom you transact. This can include Vendor, Customer, Employee or Salesperson
  - 3) Business Partner group- The Business Partner Group provides a method of defining defaults to be used for individual Business Partners.
  - 4) **Product**- Select the product so that system will display the records based on the product selected.
  - 5) Product category- Select the product category so that system will display the records based on the product category selected.
  - 6) Account Date- The Accounting Date indicates the date to be used on the General Ledger account entries generated from this document. It is also used for any currency conversion.
- 

## **Output fields:**

- 1) Document Number- Subcontract Issue document number will be displayed.
  - 2) Name- Subcontract Issue document name will be displayed.
  - 3) Document Date- Subcontract Issue document date will be displayed.
  - 4) Line- Line number is the serial number of the product in the document.
  - 5) Issued quantity- The total quantity issued to the vendor will be displayed from the subcontract issue document.
  - 6) **Product**- the product issued to the vendor will be displayed from the subcontract issue document.
-
