Locator

The screenshot displays the 'Warehouse Locators: QC Wa...' page in the Konnect Analytics application. The interface includes a top navigation bar with 'Home (7)', 'Summary', and 'Warehouse Locators: QC Wa...' tabs. A left sidebar shows 'Favourites' and 'Recent Items'. The main content area is titled 'Warehouse > Locator' and contains a search form. The form fields are as follows:

Field	Value
Client	Konnect Demo
Search Key	1000007
Warehouse	Warehouse
Organization	Manufacturing Discrete
Locator Type	FG
Active	<input checked="" type="checkbox"/>
Default	<input type="checkbox"/>
IsQC	<input checked="" type="checkbox"/>
Relative Priority	50
Aisle (X)	2
Bin (Y)	2
Level (Z)	2
Position	2

Critical Fields:

1. Aisle (X) : The X dimension indicates the Aisle a product is located in.
2. Bin (Y) : The X dimension indicates the Aisle a product is located in.
3. Level (Z) : The Z dimension indicates the Level a product is located in.

Non-Critical Fields:

1. Locator Type : Used to select the particular locator type.(Refer Locator Type Master)
2. IsQc : We should select this check box if this locator is related with QC.
3. Default : The Default Checkbox indicates if this record will be used as a default value.
4. Relative Priority : The Relative Priority indicates the location to pick from first if an product is stored in more than one location. (100 = highest priority, 0 = lowest). For outgoing shipments, the location is picked with the highest priority where the entire quantity can be shipped from. If there is no location, the location with the highest priority is used.
5. Position : It is used to mention the Position of the locator.

Replenish

The screenshot shows the 'Warehouse > Replenish' form in the Konnect Analytics application. The form is titled 'Warehouse Locators: QC Wa...' and includes a 'Record saved' message. The form fields are as follows:

Field	Value
Client	Konnect Demo
Organization	Manufacturing Discrete
Warehouse	Warehouse
Product	Pipe 20 MM_Pipe 20 MM
Active	<input checked="" type="checkbox"/>
Replenish Type	Maintain Maximum Level
Minimum Level	0.00
Maximum Level	0.00
Source Warehouse	
Locator	

Critical Fields:

1. Replenish Type : We should select the replenish type from this list. a) Maintain Maximum Level - Replenishment quantities will be ordered if the inventory level is below the maximum level. b) Reorder Below Minimum Level - Replenishment quantities will be ordered if the inventory level is below the minimum level. c) Custom - It is possible to define a custom rule in software to calculate the replenishment quantities. The software class is defined in the Warehouse window. d) Manual - A Replenishment Plan is used to calculate when and how much material to order.

Critical & onetime setup fields:

1. **Product** : We should select the replenish product from the product Master.

Non-Critical Fields:

1. Source Warehouse : We can select the source warehouse from the warehouse Master. If defined, the warehouse selected is used to replenish the product(s)

2. Minimum Level : Indicates the minimum quantity of this product to be stocked in inventory.
 3. Maximum Level : Indicates the maximum quantity of this product to be stocked in inventory.
 4. Locator : The Locator indicates where in a Warehouse a product is located.
